

The Advent Log

- log about 6 feet long (minimum of 68")
- holes drilled 2½ inches apart from center of hole to center of next hole
- drill holes 1 " deep with 3/4" "butterfly" drill bit
- drill 25 or more holes in a straight path at the top of the log
- leave about 4" from the end of the log to the first hole
- you may need to shave the bottom of the log or brace it to prevent it from tipping over
- use at least 12" candles (red, white, green, or purple)
- use a different color candle for each Sunday (If you use red candles for weekdays, mark Sunday with a white candle.)
- alternate lighting the candles from one end to the other as numbered above (Candle number 25 will be lit on Christmas Day.)

NOTE: You may want to light all of your candles from Christmas Day until New Years Day. Enjoy the Light!
